

## **THE MOBILE AMATEUR RADIO CLUB REPEATER AUTOPATCH GUIDE**

147.345 + (W4IAX autopatch)

The current access code for the autopatch is \*31. The autopatch will not accept 911 or long-distance calls.

To access autopatch: Key your transmitter and state your call sign and “accessing the autopatch.” Continue to hold PTT (Push To Talk) as you punch in (access code) and the telephone number. Release PTT for confirmation. You may then press and release PTT to silence telephone number’s audio repeat. If you release PTT before you complete dialing, the number will be rejected. You and the other party are unable to speak simultaneously as with a usual telephone conversation. The other party should be aware that everyone on frequency is listening. The repeater will warn you of access termination as you near the 3 minute limit, at which time you should clear with the other party. Press # to hang up. Hear “autopatch complete.” State your call sign and “clearing the autopatch.”
